

testing::Test

testing::WithParamInterface< std::string >

testing::TestWithParam< std::string >

CustomFunctorNamingTest

```
classDiagram
    CustomFunctorNamingTest --|> testing::TestWithParam
    testing::TestWithParam --|> testing::Test
    testing::TestWithParam --|> testing::WithParamInterface
```

The diagram illustrates the following relationships:

- CustomFunctorNamingTest** inherits from **testing::TestWithParam< std::string >**.
- testing::TestWithParam< std::string >** inherits from **testing::Test**.
- testing::TestWithParam< std::string >** inherits from **testing::WithParamInterface< std::string >**.
