

testing::Test

testing::WithParamInterface< MyEnums >

testing::TestWithParam< MyEnums >

MyEnumTest

```
classDiagram
    class Test["testing::Test"]
    class WithParamInterface["testing::WithParamInterface< MyEnums >"]
    class TestWithParam["testing::TestWithParam< MyEnums >"]
    class MyEnumTest

    TestWithParam --|> Test
    TestWithParam --|> WithParamInterface
    MyEnumTest --|> TestWithParam
```

The diagram illustrates the following relationships:

- testing::Test** and **testing::WithParamInterface< MyEnums >** are base classes for **testing::TestWithParam< MyEnums >**.
- MyEnumTest** is a specialization of **testing::TestWithParam< MyEnums >**.
